

# 2025

# Medicare Fee Schedule for Audiologists

## General Information

---

The American Speech-Language-Hearing Association (ASHA) developed this document to provide an analysis of the 2025 Medicare Physician Fee Schedule (MPFS), including comments on relevant policy changes, a list of Current Procedural Terminology (CPT® American Medical Association) codes used by audiologists with their national average payment amounts, and useful links to additional information.

Audiologists should always consult their local [Medicare Administrative Contractor](#) for final rates and coverage guidelines.

[ASHA's Medicare outpatient payment website](#) provides additional information regarding the MPFS, including background information, how providers should calculate Medicare payment, and audiology-specific payment and coding rules. If you have any questions, contact [reimbursement@asha.org](mailto:reimbursement@asha.org).

## Overview

---

Outpatient audiology services provided under Part B of the Medicare program are paid under the Medicare Physician Fee Schedule (MPFS). Congress approves annual payment updates to the MPFS, which are frozen at 0.0% from 2020 through 2025 because of a provision in the Medicare Access and CHIP Reauthorization Act of 2015. Additional payment adjustments—based on legislative actions, or participation in the Merit-based Incentive Payment System (MIPS) or Advanced Alternative Payment Models (APMs)—may also apply.

Rates associated with individual Current Procedural Terminology (CPT®) codes may continue to fluctuate due to adjustments to professional work, practice expense, and malpractice insurance values that are part of the fee calculation. In addition, the Centers for Medicare & Medicaid Services (CMS) may request a review and revaluation of certain codes that are flagged as potentially misvalued services.

This document includes regulations and rates for implementation on January 1, 2025, for audiologists providing services to Medicare Part B beneficiaries under the MPFS. Key policies addressed in this analysis include coding updates; access to audiology services without a physician order; quality reporting; APMs; and national payment rates for audiology-related services.

[ASHA's Medicare outpatient payment resources](#) provide additional information regarding the MPFS, including background information, instructions for calculating Medicare payment, and audiology payment and coding rules. Note that a separate payment system applies to audiology services provided in hospital outpatient departments. If you have any questions, please contact [reimbursement@asha.org](mailto:reimbursement@asha.org).

## Analysis of the 2025 Medicare Physician Fee Schedule (MPFS)

---

ASHA reviewed relevant sections of the [2025 MPFS final rule](#) and offers the following analysis of key issues for audiologists.

### Payment Rates

Significant payment cuts to all services provided under the MPFS will continue in 2025. These cuts have gone into effect each year since 2021 due to changes in payment for outpatient office-based evaluation and management (E/M) services and adjustments to the annual conversion factor. Although [advocacy by ASHA and other stakeholders](#) resulted in legislation that mitigated the cuts each year—including in 2024—audiologists will continue to face significant cuts without additional intervention from Congress.

ASHA continues working with allied stakeholders to convince Congress to address the cuts with a positive adjustment for 2025 and to seek long-term solutions to fix the Medicare outpatient payment system. This ongoing advocacy is necessary to mitigate the anticipated payment reduction, which could be as high as 9%. ASHA members should prepare for the possibility the reduction will go into effect January 1, 2025. Although Congress has mitigated these cuts the past several years, policy and political dynamics may push potential action to next year, after the cuts take effect. ASHA will continue to monitor and provide updates as the situation evolves.

ASHA strongly encourages audiologists to [contact their members of Congress](#) and ask them to address the Medicare cuts before the end of the year.

### Conversion Factor (CF)

CMS uses the CF to calculate MPFS payment rates. CMS established a calendar year (CY) 2025 CF of **\$32.35**, representing a 2.8% decrease from the \$33.29 CF for 2024. Although CMS included a 0.02% positive budget neutrality adjustment, the decrease in the CF is mostly due to expiration of the temporary 2.93% positive adjustment that Congress implemented to temporarily mitigate significant payment cuts in 2024.

## Payment Changes for Audiology Services

CMS also provides a regulatory impact analysis (RIA), which estimates cumulative payment changes for providers *in addition* to the CF cut. For 2025, it's estimated that audiologists will see a cumulative 0% additional change in payments based on policy changes. However, the analysis also shows that most individual audiologists will experience between a negative 1% to a positive 1% shift in payment in 2025 *in addition* to the CF adjustment.

Medicare providers also face other Medicare cuts known as sequestration (2% reduction) and statutory "Pay-As-You-Go," or PAYGO (4% reduction). Without congressional action, audiologists could experience a total cut of about 9% to overall Medicare payments when added to the MPFS payment cuts. Congress has consistently acted by passing legislation that significantly reduced some of the cuts over the past few years, including this year. ASHA continues to advocate for legislation to address these annual reductions and ensure audiologists are aware of the potential impact on their Medicare payments.

The estimated impacts calculated by CMS reflect average payments based on cumulative audiology spending under the MPFS. However, they may not reflect the changes experienced by individual audiologists or practices, as actual payment depends on several factors, including locality-specific rates and the CPT codes billed. For example, CPT code 92557 (comprehensive audiometry) will see a 3% decrease to the national payment rate while CPT code 92552 (pure tone audiometry [threshold]; air only) will experience a 2% increase. As a result, to determine the actual impact of the payment changes on their practice, audiologists should calculate payments based on their specific billing patterns and locality.

**See Table 1 (p. 8)** for a listing of audiology-related procedures and corresponding national payment rates. The table also includes 2024 nonfacility rates for comparison with the updated 2025 rates to help audiologists estimate the impact of the payment cuts. Visit ASHA's webpage on calculating Medicare fee schedule rates for information on how to access [fees based on locality](#).

## Relative Value Units

The value of each CPT code is calculated by separating the cost of providing the service into relative value units (RVUs) for three components:

- 1) Professional work of the qualified health care professional;
- 2) Practice expense (direct cost to provide the service); and
- 3) Professional liability (malpractice) insurance.

The total RVUs for each service is the sum of the three components (components are adjusted for geographical differences). The RVUs for any particular CPT code are multiplied by the CF to determine the corresponding fee. **See Table 3 (p. 21)** for a detailed chart of final 2025 RVUs.

ASHA, through its Health Care Economics Committee, has worked with other audiology and physician groups to present data to the American Medical Association (AMA) Relative Value Update Committee (RUC) Health Care Professionals Advisory Committee (HCPAC) to systematically transfer the audiologist's time and effort out of the practice expense and into professional work. Professional work RVUs rarely change over time, unlike practice expense values that fluctuate according to CMS payment formula policies. This effort is ongoing, leaving some codes with only practice expense and malpractice components. ASHA is working with the American Academy of Audiology (AAA) and other audiology and specialty societies to address these issues. See ASHA's website for more information on the [CPT code development and valuation process](#) [PDF].

## Access to Audiology Services Without a Physician Order

In 2023, CMS implemented a policy that allows audiologists to provide nonacute hearing assessment services—under limited circumstances—without a physician order. No substantive changes were made to this policy for 2025. More details regarding this policy can be found on the [ASHA website](#).

ASHA continues to monitor the implementation of this policy and to advocate for improvements. Data for the first year of the program will be available in 2025. This will allow ASHA to gain a better understanding of its use and utility as we seek to improve the policy. In addition, ASHA supports legislation that would improve the Medicare audiology benefit to include removal of the physician order requirement, coverage of both assessment and treatment services, and reclassifying audiologists as “practitioners,” which would allow them to bill for telehealth services on a permanent basis.

Audiologists can take action by [contacting their members of Congress today](#) to encourage them to cosponsor the Medicare Audiology Access Improvement Act (H.R. 6445/S. 2377).

## Medicare Telehealth Services

CMS “clarifies” that the CPT codes audiologists use will remain covered telehealth services in 2025. However, Congress needs to pass legislation to temporarily or permanently extend telehealth coverage for nonphysician clinicians such as audiologists. If Congress fails to act, audiologists can enter into private pay arrangements with Medicare beneficiaries for telehealth services. See [Providing Audiology and Speech-Language Pathology Telehealth Services Under Medicare](#) for more information.

ASHA remains committed to securing permanent authority for audiologists to receive reimbursement for services provided via telehealth at parity with payment for in-person services. Audiologists can advocate for permanent congressional authority to be telehealth providers under Medicare by [urging Congress to support the Expanded Telehealth Access Act \(H.R. 3875/S. 2880\)](#).

## Telehealth Billing Changes

ASHA was pleased to see that several telehealth-related changes were finalized for 2025. CMS will continue to allow clinicians who are providing telehealth services to Medicare beneficiaries from their homes to use their business address on claims to protect their privacy and security. CMS will also permanently allow two-way, real-time audio-only communication technology to qualify as a telehealth service furnished to a beneficiary in their home if the clinician is technically capable of using audio and video equipment that enables two-way, real-time interactive communication, but the patient is not capable of, or does not consent to, the use of video technology. To use this flexibility, clinicians in outpatient settings will be required to report modifier “93” (audio-only synchronous telemedicine service) on the claim to verify that these conditions have been met.

## The Quality Payment Program (QPP)

The QPP transitions Medicare payments away from a volume-based fee-for-service payment to a more value-based system of quality and outcomes-based reimbursement. The program includes the Merit-based Incentive Payment System and Advanced Alternative Payment Models. ASHA’s website provides more information on the [QPP](#).

## Merit-Based Incentive Payment System (MIPS)

MIPS represents one track of the QPP that focuses on quality improvement in fee-for-service Medicare. Audiologists first became eligible for MIPS in 2019 and will continue to participate in the program in 2025. If an audiologist meets the criteria for a MIPS eligible clinician, they will need to report data associated with quality measures, promoting interoperability, and improvement activities in 2025, which will be used to adjust their payments in 2027.

**Because CMS has set exclusions and low-volume thresholds, a large majority of audiologists will continue to be excluded from mandatory MIPS participation for 2025.** MIPS only applies to clinicians in outpatient nonfacility settings. In addition, clinicians must meet **ALL** of the following criteria to be required to participate:

- Bill \$90,000 or more in allowed charges to the Medicare program for professional services;
- Treat 200 or more distinct Medicare beneficiaries; and

- Provide 200 or more distinct procedures.

For participants subject to mandatory reporting, CMS will apply a payment incentive or penalty to 2027 Medicare payments for performance on the quality, promoting interoperability, and improvement activities (IAs) performance categories in 2025. Clinicians meeting one or two of the criteria may opt in to the program to compete for payment adjustments while others—who do not meet any of the criteria—may voluntarily report to gain experience. Required participants who choose not to report will be subject to the maximum payment reduction of 9% for the year.

For the quality performance category, MIPS eligible clinicians—including audiologists—must report a minimum of six measures when/if six measures apply. In 2025, audiologists have 12 potentially applicable measures to choose from. This provides audiologists with the flexibility to select six measures from the 12 options for reporting. For additional information, CMS provides [extensive resources on MIPS](#) on its website.

- Measure 130: Documentation of Current Medications in the Medical Record
- Measure 134: Preventive Care and Screening: Screening for Depression and Follow-Up Plan
- Measure 155: Falls: Plan of Care
- Measure 181: Elder Maltreatment Screen and Follow-Up Plan
- Measure 182: Functional Outcome Assessment
- Measure 226: Preventive Care and Screening: Tobacco Use: Screening and Cessation Intervention
- Measure 261: Referral for Otologic Evaluation for Patients with Acute or Chronic Dizziness
- Measure 318: Falls: Screening for Future Falls Risk
- Measure 431: Preventive Care and Screening: Unhealthy Alcohol Use: Screening and Brief Counseling
- Measure 487: Screening for Social Drivers of Health
- Measure 317: Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented
- Measure 498: Connection to Community Service Provider: Percent of patients 18 years or older who screen positive for one or more of the following health-related social needs (HRSNs)

CMS eliminated the weighting (e.g., medium, high) associated with IAs. For the IA performance category, audiologists must complete two activities and attest to their completion via the [CMS QPP website](#).

### Advanced Alternative Payment Models (APMs)

Only a small percentage of audiologists participate in the APM track. These clinicians typically work for larger health systems and have the support of finance and administration departments to manage the complexity of such models.

CMS added new quality measures and will reward efforts to improve health equity. Audiologists working for organizations participating in APMs can help their organizations earn incentive payments by engaging in quality improvement efforts.

To incentivize accountable care organizations (ACOs) to serve more beneficiaries from underserved communities, CMS finalized a Health Equity Benchmark Adjustment (HEBA) to be applied based on the number of beneficiaries they serve who are dually eligible or enrolled in the Medicare Part D Low-Income Subsidy (LIS).

CMS will also require ACOs to report the APM Performance Pathway (APP) Plus Quality Measure Set. This includes the six measures currently in the APP quality measure set and incrementally incorporate the remaining five Adult Universal Foundation quality measures by the 2028 performance period/2030

payment year with preference for reporting electronically through electronic clinical quality measures (eCQMs).

New measures included in the APP Plus Quality Measure Set for Shared Savings Program ACOs that could involve audiologists include:

- #479 Hospital-Wide, 30-day, All-Cause Unplanned Readmission (HWR) Rate for MIPS Eligible Clinician Groups beginning in PY 2025
- #484 Clinician and Clinician Group Risk-Standardized Hospital Admission Rates for Patients With Multiple Chronic Conditions Beginning PY 2026 (claims-based measure)
- #487 Screening for Social Drivers of Health beginning in PY 2028.

CMS also finalized a new calculation methodology to account for the impact of improper payments when reopening a payment determination to recoup payments it believes were not properly earned.

# 2025 Medicare Physician Fee Schedule for Audiology Services

**Table 1. National Medicare Part B Rates for Audiology Services**

The following table contains full descriptors and national payment rates for audiology-related services. ASHA calculated rates by multiplying the total RVUs for each CPT code by the updated 2025 CF (**\$32.3465**). The table also includes 2024 nonfacility rates for comparison with 2025 rates to help audiologists estimate the impact of the payment cuts. Please see [ASHA's Medicare outpatient payment](#) website for other important information on Medicare CPT coding rules and Medicare fee calculations, including information on how to find rates by locality.

Medicare pays for audiology services at both [facility and nonfacility rates](#), depending on setting. Nonfacility settings include physician offices, private practices, and outpatient clinics. Note that a separate payment system applies to audiology services provided in hospital outpatient departments. Please see [ASHA's Medicare CPT Coding Rules for Audiology Services](#) for additional Medicare Part B coding guidance.

92545		Oscillating tracking test, with recording	\$16.64	<b>\$16.64</b>	<b>N/A</b>	
92545	TC	Oscillating tracking test...	\$3.66	<b>\$3.56</b>	<b>N/A</b>	
92545	26	Oscillating tracking test...	\$12.98	<b>\$12.94</b>	<b>\$12.94</b>	
92546		Sinusoidal vertical axis rotational testing	\$132.48	<b>\$129.06</b>	<b>N/A</b>	

Code	Mod	Descriptor	2024 National Fee <i>Nonfacility</i>	2025 National Fee		Notes
				<i>Nonfacility</i>	<i>Facility</i>	
92546	TC	Sinusoidal vertical axis rotational testing	\$117.84	<b>\$114.83</b>	<b>N/A</b>	
92546	26	Sinusoidal vertical axis rotational testing	\$14.65	<b>\$14.23</b>	<b>\$14.23</b>	
92547		Use of vertical electrodes (List separately in addition to code for primary procedure)	\$10.65	<b>\$10.03</b>	<b>N/A</b>	Report this code in addition to the code(s) for the primary procedures for each vestibular test performed (92537-92546).
92548		Computerized dynamic posturography, sensory organization test (CDP-SOT)	\$46.94	<b>\$45.29</b>	<b>N/A</b>	
92548	TC	CDP-SOT	\$13.98	<b>\$13.59</b>	<b>N/A</b>	
92548	26	CDP-SOT	\$32.95	<b>\$32.02</b>	<b>\$32.02</b>	
92549		with motor control test (MCT) and adaptation test (ADT)	\$64.24	<b>\$62.75</b>	<b>N/A</b>	This is a standalone code to report when performing all three CDP tests (SOT, MCT, and ADT). Don't bill in conjunction with 92548.
92549	TC	with MCT and ADT	\$20.31	<b>\$19.73</b>	<b>N/A</b>	
92549	26	with MCT and ADT	\$43.94	<b>\$43.02</b>	<b>\$43.02</b>	
92550		Tympanometry and reflex threshold measurements	\$21.64	<b>\$21.03</b>	<b>N/A</b>	Report 92550 when performing both tympanometry and reflex threshold measures on the same day. Bill 92567 or 92568 if you don't perform both tests on the same day.  Don't report 92550 in conjunction with 92567 or 92568.
92552		Pure tone audiometry (threshold); air only	\$37.95	<b>\$38.82</b>	<b>N/A</b>	
92553		air and bone	\$45.94	<b>\$46.90</b>	<b>N/A</b>	
92555		Speech audiometry threshold;	\$28.96	<b>\$29.44</b>	<b>N/A</b>	
92556		with speech recognition	\$44.94	<b>\$45.61</b>	<b>N/A</b>	

Code	Mod	Descriptor	2024 National Fee <i>Nonfacility</i>	2025 National Fee		Notes
				<i>Nonfacility</i>	<i>Facility</i>	
92557		Comprehensive audiometry threshold evaluation and speech recognition (92553 and 92556 combined)	\$36.28	<b>\$35.26</b>	<b>\$30.73</b>	Don't report 92557 if you haven't completed all required components (pure tone air and bone conduction, speech reception thresholds, and speech recognition testing). Instead, bill for the individual components of testing using 92552, 92553, 92555, or 92556.  Don't report 92557 in conjunction with 92552, 92553, 92555, or 92556.
92562		Loudness balance test, alternate binaural or monaural	\$48.27	<b>\$48.20</b>	<b>N/A</b>	
92563		Tone decay test	\$34.62	<b>\$34.61</b>	<b>N/A</b>	
92565		Stenger test, pure tone	\$20.97	<b>\$21.35</b>	<b>N/A</b>	
92567		Tympanometry (impedance testing)	\$16.31	<b>\$15.53</b>	<b>\$10.35</b>	
92568		Acoustic reflex testing, threshold	\$14.98	<b>\$14.56</b>	<b>\$14.56</b>	
92570		Acoustic immittance testing, includes tympanometry (impedance testing), acoustic reflex threshold testing, and acoustic reflex decay testing	\$31.96	<b>\$31.05</b>	<b>\$27.82</b>	Don't bill 92570 if you haven't completed all three components of testing, as listed in the code descriptor. Instead, bill for the individual tests, 92567 or 92568.  Don't report 92570 in conjunction with 92567 or 92568.
92571		Filtered speech test	\$30.96	<b>\$30.73</b>	<b>N/A</b>	
92572		Staggered spondaic word test	\$53.26	<b>\$55.64</b>	<b>N/A</b>	
92575		Sensorineural acuity level test	\$73.90	<b>\$71.81</b>	<b>N/A</b>	
92576		Synthetic sentence identification test	\$42.61	<b>\$43.99</b>	<b>N/A</b>	
92577		Stenger test, speech	\$21.97	<b>\$22.32</b>	<b>N/A</b>	
92579		Visual reinforcement audiometry (VRA)	\$43.94	<b>\$42.70</b>	<b>\$35.58</b>	
92582		Conditioning play audiometry	\$86.55	<b>\$86.69</b>	<b>N/A</b>	
92583		Select picture audiometry	\$56.92	<b>\$58.22</b>	<b>N/A</b>	
92584		Electrocochleography	\$110.51	<b>\$104.80</b>	<b>N/A</b>	

Code	Mod	Descriptor	2024 National Fee <i>Nonfacility</i>	2025 National Fee		Notes
				<i>Nonfacility</i>	<i>Facility</i>	
92587		Distortion product evoked otoacoustic emissions; limited evaluation (to confirm the presence or absence of hearing disorder, 3–6 frequencies) or transient evoked otoacoustic emissions, with interpretation and report	\$21.30	<b>\$21.03</b>	<b>N/A</b>	See also: <a href="#">CPT Coding for Otoacoustic Emissions</a>
92587	TC	Distortion product evoked otoacoustic emissions...limited	\$3.66	<b>\$31.56</b>	<b>N/A</b>	
92587	26	Distortion product evoked otoacoustic emissions...limited	\$17.64	<b>\$17.47</b>	<b>\$17.47</b>	
92588		Distortion product evoked otoacoustic emissions; comprehensive diagnostic evaluation (quantitative analysis of outer hair cell function by cochlear mapping, minimum of 12 frequencies), with interpretation and report	\$32.95	<b>\$32.35</b>	<b>N/A</b>	See also: <a href="#">CPT Coding for Otoacoustic Emissions</a>
92588	TC	Distortion product evoked otoacoustic emissions...comprehensive	\$4.99	<b>\$4.85</b>	<b>N/A</b>

**Table 2. National Medicare Part B Rates for Treatment, Electrophysiology, or Nonbenefit Services**

Audiologists may not directly bill Medicare for the procedures listed in this table because CMS reimburses audiologists only for diagnostic hearing and balance services. Although they are within the scope of practice of an audiologist, Medicare does not recognize screenings, treatment, hearing aid, and electrophysiological services outside the hearing and balance systems when performed by an audiologist. Services in this table that are included as a Medicare benefit may be billed to Medicare when performed under the supervision of a physician and billed under the physician’s National Provider Identifier (NPI) number (“[incident to](#)”). Services listed in Table 1 (p. 8) that are part of the audiology benefit must be billed under the audiologist’s NPI and may *not* be billed “incident to” a physician (i.e., under the physician’s NPI).

Code	Mod	Descriptor	2025 National Fee		Notes
			Nonfacility	Facility	
69209		Removal impacted cerumen using irrigation/lavage, unilateral	\$15.20	N/A	Not covered under the audiology benefit.
69210		Removal impacted cerumen requiring instrumentation, unilateral (for bilateral procedure, report 69210)	\$46.58	\$31.05	Not covered under the audiology benefit.
92516		Facial nerve function studies (eg, electroneuronography)	\$70.52	\$21.67	Covered under physician supervision.
92531		Spontaneous nystagmus, including gaze	\$0.00	\$0.00	Medicare doesn’t cover vestibular tests <i>without</i> recording. See <b>92537-92548</b> in Table 1 for vestibular tests with recording.
92532		Positional nystagmus test	\$0.00	\$0.00	
92533		Caloric vestibular test, each irrigation (binaural, bithermal stimulation constitutes 4 tests)	\$0.00	\$0.00	
92534		Optokinetic nystagmus test	\$0.00	\$0.00	
92551		Screening test, pure tone, air only	\$12.29	N/A	Medicare doesn’t cover screenings, but rates are published as reference when available.
92558		Evoked otoacoustic emissions, screening (qualitative measurement of distortion product or transient evoked otoacoustic emissions), automated analysis	\$9.06	\$8.09	Medicare doesn’t cover screenings, but rates are published as reference when available.
92590		Hearing aid examination and selection; monaural	\$0.00	\$0.00	Medicare doesn’t cover services related to hearing aids.
92591		binaural	\$0.00	\$0.00	
92592		Hearing aid check; monaural	\$0.00	\$0.00

## How to Read the MPFS and RVU Tables

### Modifiers:

**26:** “Professional component,” the portion of a diagnostic test that involves a clinician’s work and allocation of the practice expense.

**TC:** “Technical component,” for diagnostic tests, the portion of a procedure that does not include a clinician’s participation. *The TC value is the difference between the global value and the professional component (26).*

**No Modifier:** “Global value” includes both professional and technical components. In most cases, services provided by an audiologist will be paid at the global value when both testing, interpretation, and report are completed by the audiologist.

### “N/A” in Fee Columns:

**Nonfacility:** No rate established because service is typically performed in the hospital. If the contractor determines the service can be performed in the nonfacility setting, it will be paid at the facility rate.

**Facility:** No rate established because service is not typically paid under the MPFS when provided in a facility setting. These services, including “incident to” and the TC portion of diagnostic tests, are generally paid under the hospital OPPS or bundled into the hospital inpatient prospective payment system. In some cases, these services may be paid in a facility setting at the MPFS rate, but there would be no payment made to the practitioner under the MPFS in these situations.

**ASHA**  
American  
Speech-Language-Hearing  
Association
